NOW CERTIFIED!

The valve series 63 from GSR Ventiltechnik now fulfils the strict requirements of Regulation (EC) No. 1935/2004 and is officially certified - confirmed by an independent notified body - for contact with all types of food. This certification offers greater safety and reliability in sensitive production processes that require the highest levels of hygienic and material quality.

Our certified valves are ideal for:

- Contact with all types of food
- Long-term and repeated contact
- Temperatures up to 176 °F

Series 63 guarantees safety and hygienic at the highest level and offers a perfect solution for the demanding processes of the food and beverage industry. The certification confirms that the valves meet the latest safety and quality standards, making them a reliable choice for direct food contact.
